I talked to one of the guys who toured their main factory and apparently they have 9 R&D departments and their own big dirt testing track out back, so they are for real. He also showed me pix of the knock-off factories, with no R&D and no testing. So it seems Linhai is for real, in it for the long run.

The theme of this book is the political practices by Zhejiang Government under the guidance of ‘China Dream’ policy. It reviews the political facets of governance, The People’s Congress System, the consultative system, grassroots democracy, rule of law, government function, restriction and supervision of power and the united front. These areas are the foundations of Chinese government, and are currently discussed in detail from the point of view of the Zhejiang local administration. As China has its unique political system, this book could help scholars and policy makers around the globe better understand the operation of Chinese government and political goals for the future under the guidance of the statecraft.

In recent years many new international market leaders from the BRICS countries have emerged in several manufacturing and service industries. This important study answers a number of crucial questions including, how did these companies rise up to become important players in their respective industries? What is the contribution of systemic and country specific factors? What is the role of internal firm factors in enabling these companies to become market leaders? The book presents evidence from companies in the automotive, pharmaceutical and ICT industries of China, India and Brazil.

This book provides, in an easy-to-use format, an extensive collection of data and information on China’s 31 provinces and its interprovincial economic linkages. Intended as a comprehensive resource book, it profiles the geography, demography, and economy for each province. The materials presented, which are gathered from a variety of sources, including many not easily found in English-language media, will be of great value to students, researchers, business and government agencies, and news media professionals who are interested in either individual provinces or China as a whole.

China is the world’s top agricultural producer according to a World Trade Organization 2010 report, but a growing number of alarming safety issues has put the world’s top manufacturer of food on the defensive. Food Safety in China: A Comprehensive Review chronicles China’s current food safety problems from a professional perspective. This text describes key concepts, incorporates a research thread, considers various methods, provides context, and presents main conclusions. Containing investigative research and presenting an authoritative analysis of the subject, this text considers the complex issues that span the entire food supply chain system. It provides an overview of the current food safety situation, as well as its development and changes. It also details the structure of the food safety support system, and addresses growing concerns. Explores Involvement in Stages The book considers the interrelationship between the government, producers and traders, and consumers. It studies technical and management issues, and explains how that impacts businesses, the government regulatory system, and the end user. Factoring in the risks that can be caused by both natural and human influences, including the abuse of food additives, this book reviews the efforts put forth by China to prevent food safety issues. It examines the changing track of food safety (including imported and exported products) in key aspects such as production, circulation, and consumption from 2006 to 2011 based on empirical investigation and comprehensive use of various statistical data, and examines most specifically China’s food safety situation in 2011. This book addresses: Food production and processing Food transportation Food consumption Environment and consumer awareness of food safety Efforts and technical means of the government in food regulation Social responsibility of food producers and traders, and moral traits and professional qualities of employees Rationality, effectiveness, and operability of the technical specifications in production, processing, circulation, and consumption Food Safety in China: A Comprehensive Review provides an assessment of the actual state and future trends of the food safety risk in China. This text is an ideal resource for food product developers, regulators and government researchers, regulatory agencies, policy makers, and policy analysts as well as universities, colleges, researchers, students, investors, importers, exporters, and manufacturers of food.

Pterosaurs, the first vertebrates to evolve powered flight, are undergoing a long-running scientific renaissance that has seen sustained, and even elevated interest, from several generations of palaeontologists. These incredible reptiles are known from every continent, flew the Mesozoic skies for at least 160 million years, diversified into more than a dozen major clades and well over 100 species, and included the largest flying animals of all time. This volume brings together leading pterosaur researchers from around the globe to discuss new and cutting-edge research into various aspects of pterosaur palaeobiology and presents diverse papers to deliver new insights on flying reptile palaeoecology, flight, ontogeny, skeletal and soft-tissue anatomy, temporal and spatial distribution and evolution, as well as revisions of their taxonomy and interrelationships.

This book provides authoritative academic and professional insights into the strategies of Chinese Foreign Direct Investments in Europe, Asia, Africa and the Americas. Distinguished authors from across the world will make a contribution to the growing literature on OFDI (outward foreign direct investment) from China.

This volume comprises a collection of papers which were subjected to strict peer-review by 2 to 4 expert referees. It aims to present the latest advances in, and applications of, structural engineering, bridge engineering, tunnel, subway and underground facilities, seismic engineering, environment-friendly construction and development, monitoring and control of structures, structural rehabilitation, retrofitting and strengthening, reliability and durability of structures, computational mechanics, construction technology, etc. This will be essential reading matter for those involved in public works, at every level.

After Pearl Harbor, he led America’s flight to victory General Doolittle is a giant of the twentieth century. He did it all. As a stunt pilot, he thrilled the world with his aerial acrobatics. As a scientist, he pioneered the development of modern aviation technology. During World War II, he served his country as a fearless and innovative air warrior, organizing and leading the devastating raid against Japan immortalized in the film Thirty Seconds Over Tokyo. Now, for the first time, here is his life story ◊ modest, revealing, and candid as only Doolittle himself can tell it.

Orthohepadnavirus/Advances in Research and Treatment: 2012 Edition is a ScholarlyBrief that delivers timely, authoritative, comprehensive, and specialized information about Orthohepadnavirus in a concise format.
