1. Watch what you eat and drink. It sounds obvious, but having a balanced diet is crucial for good health, energy and preventing illness. An ideal diet should be low in saturated fat, with lots of fruit and vegetables, wholegrains, oily fish, and small amounts of low-fat dairy and lean meat. Don't forget to top-up with lots of water to avoid dehydration, which can make you feel tired and confused.

How to age well: 10 tips for healthy ageing | Age UK

Healthy ageing and caring Being able to stay healthy in later life is a crucial issue for all of us. We know that older people often do not feel supported to look after their own health, particularly people with multiple long term conditions, including frailty. This has a detrimental impact on their quality of life and health outcomes.

NHS England » Healthy ageing and caring

Get adequate amounts of vitamin D. The recommended daily intake of vitamin D is 600 international units for adults up to age 70 and 800 IU for adults over 70. Many people get adequate amounts of vitamin D from sunlight. Other sources include tuna, salmon, eggs, vitamin D-fortified milk and vitamin D supplements.

Aging: What to expect - Mayo Clinic

Age-friendly health systems pay particular attention to: Providing older adults the best care possible. Reducing some of the specific harms older adults face more often than others. Ensuring older adults, our families, and our caregivers are satisfied with care.
