The newest edition of the Anaesthesia Tutorial of the Week (ATOTW #321) covers the much underestimated but critically important topic of predicting and managing difficulty in face mask ventilation. Irish anaesthetists Jonathan Holland and Will Donaldson have created a useful resource for anyone studying or performing airway management, or refreshing for exam purposes.

Introduction to Intraoperative Neurophysiological ...

One lung ventilation (OLV) is the term used in thoracic anaesthesia to describe the ability to ventilate one of a patient ' s lungs, allowing the other one to collapse. This tutorial will describe indications for OLV, techniques used to achieve OLV, the physiological changes associated with OLV and ways that oxygenation can be improved during OLV.

Anaesthesia UK : One-lung anaesthesia

Last week I posted a lecture by Paul Marik on Fluid Management in severe sepsis. The lecture is the equivalent of a bucket of ice water poured over your head. Now let's give you a towel and discuss.

Anaesthesia Tutorial of the Week | AAGBI | Litt...

Department of Anaesthesia, Hope Hospital, Salford M6 8HD, UK. E mail: mptrivedi85@yahoo.com. Before reading the tutorial try answering the following: What is an opioid and how do they work? How can opioid analgesics be classified? What are the adverse effects of opioids? Why is it useful to know the lipid solubility of an opioid?

Anaesthesia UK : Pharmacology of Opioids I

1) induce anaesthesia with i.m. ketamine (5-10mg/kg) + atropine (20mcg/kg) + diazepam (0.1mg/kg) these may all be mixed in the same syringe. Onset of anaesthesia will start about 5 minutes after injection. The disadvantage of this technique is that it requires a relatively

large i.m. injection.

Anaesthesia UK : Ketamine in Anaesthetic Practice

Regional anaesthesia. Good regional anaesthesia may reduce opioid and inhalational requirements intraoperatively in thoracic and abdominal surgery and may also be used as the sole technique in peripheral surgery. However it is technically harder because of the loss of landmarks, increased movement of the skin and the need for long needles.
