'...erudite, thought-provoking and well-written.' Archie Brown, Professor of Politics, Oxford University. The return to prominence of the concept of political culture offers an opportunity to re-evaluate its contribution to the social sciences. This study casts a broader than usual net, embracing not only political science (with equal emphasis placed on the concept's use in communist studies), but also sociology and history. On this basis a distinctive theory of political culture, and not merely another typology, is developed. Political culture, instead of being a token in the sterile debate between interest- and culture-based explanation, offers the means of transcending that debate.

Designed for introductory courses in aerodynamics, aeronautics and flight mechanics, this text examines the aerodynamics, propulsion, performance, stability and control of an aircraft. Major topics include lift, drag, compressible flow, design information, propellers, piston engines, turbojets, statics, dynamics, automatic stability and control. Two new chapters have been added to this edition on helicopters, V/STOL aircraft, and automatic control.

Of all the new technologies that have evolved recently, integrated circuit technology is the one that continues to experience phenomenal growth. The vast amount of material arising from innovative circuit designs and newer device technologies requires that the circuit analysis aspects of digital electronics be covered in a first course, separate from device design and chip layout. Consequently, Introduction to Digital Microelectronic Circuits emphasizes the analysis and performance comparison of different gate-level logic circuits and presents design examples based on logic-level requirements. It provides an introduction to the analysis of digital electronic circuits using discrete and integrated circuits.

The Australian Medico-Legal Handbook will be provided with PDA software and aims to give JMOs immediate, clear and concise answers to the most frequently asked legal questions arising during hospital training. Doctors carry very little when they are in the ward but are increasingly carrying PDAs, making the accompanying software an ideal content delivery method. The handbook and accompanying PDA software is the only one of its kind offered to Australian JMOs. Content development is based around the authors' research through ongoing focus groups into the most commonly asked questions by the end user, that is, JMOs in the hospital training environment. Law updates and other relevant materials (including guidelines and links to relevant Health Department documents) will be provided on the accompanying Evolve site. Written by a proven author team, each an expert in the medico-legal and/or ethical fields. Clinical problems will be outlined with cross-referencing to the appropriate sections of the handbook. These questions will be posed in the style and format used by clinicians, for example: 'What if I get sued?' 'What do I do if someone refuses treatment?' 'What deaths do I refer to the Coroner?' 'What if I make a mistake?' 'Who makes decisions about a child's treatment?'
