Business cycles are identified as having four distinct phases: expansion, peak, contraction, and trough. An expansion is characterized by increasing employment, economic growth, and upward pressure on prices.

### Reading: The Business Cycle: Definition and Phases ...

As pointed out by Professor Kirzner (2001, pp. 137, 140), Mises did not start out with the intent to develop a theory of the trade cycle. The trade cycle argument first appeared in the last few pages of The Theory of Money and Credit (1912). This early development of Austrian business cycle theory was a direct manifestation of Mises's rejection of the concept of neutral money and "emerged as ...
