Communication Networks (2nd Edition)

Chapter 6 Solutions Solution: To maximize the successful transmission rate is to maximize the probability of successful transmission. $P(\text{success}) = (\text{number of stations}) \times P(\text{one station transmits on one bus}) \times P(\text{no other station transmit on the same bus}) = 3 \times 2 \times (1 - p)^2 = 2 \times (1 - p)^2$
