American Abstract Expressionism is not only one of the most fascinating but also one of the most influential periods in contemporary art after the 1940's. *Abstraction, Gesture, Ecriture* illustrates -- in the essays of well-known art critics as well as in the paintings selected from the Daros Collection -- the different abstractions and gestures in contemporary American art. It focuses on American artists who conceived of a way of painting which began with the scrawl-like gestures of Jackson Pollock, Willem de Kooning and Joan Mitchell. Then the scriptural gesture, developed out of handwriting, is examined in an extraordinary group of work that spans Cy Twombly's whole career. Brice Marden's alternately fluid and tensile linear abstractions and Robert Rymans intensive occupation with the stroke of a brush are discussed as well as Andy Warhol's answers to Abstract Expressionism in his *Oxidation and Shadow Paintings* in 1978. This particular movement in Abstract Expressionism has provoked an on-going dialogue in painting. *Abstraction, Gesture, Ecriture* covers this original gesture from the Action Painters and its resonance through the next generation of painters. Each painting discussed comes from the Daros Collection, a Swiss private collection which is one of the internationally most important private collections of contemporary art focusing on American art of the last 50 years. The carefully selected authors, all well respected in the art and academic world, complete this extraordinary and beautifully designed volume. The perfect gift book!

After the overwhelming success of the original, this lavishly illustrated and superbly printed art book is now available in trade paper. From the sometimes eccentric but remarkable work, rooted in symbolism and theosophy, of pioneers such as Kathleen Munn, Bertram Brooker and Lawren Harris, to the Automatistes in Montreal, to the conceptual art movement in Halifax, the urge to abstraction in art is spread wide across Canada. *Abstract Painting in Canada* covers the movement throughout the twentieth century, including highlights from 1940s Montreal and the Clement Greenberg-influenced Prairies in the sixties and seventies. The book continues through the eighties and nineties, during which critics largely denounced painting, and concludes in the twenty-first century, with abstract painting alive and well again in the studios of Canada's young artists. A monumental tome containing 200 colour reproductions, it mines a rich vein of art history ripe for international discovery.

Where is American art in the new millennium? At the heart of all cultural developments is diversity. Access through recent technology engenders interaction with artists from around the world. The visual arts in the United States are bold and pulsating with new ideas.

"Three essays documenting the phenomenon of maintaining an original, independent voice and vision in the art world."

El libro reúne un total de 32 textos de exposiciones realizadas por famosos teóricos y críticos del arte contemporáneo internacional, en el período 1980-1995. Incluye además un prólogo general y datos biográficos de los autores.
