I looked up the engine diagram and it is not showing a camshaft sensor just an oil pressure sensor (881879T11) under the cam area of the diagram. It does however show a crankshaft

Access Free Crank Positioning Sensor

sensor. Even typing in google

"Mercruiser camshaft sensor" the first part that comes up is actually the crankshaft sensor.

Camshaft Sensor or Crankshaft Sensor
- Rinker Boat Company

The crankshaft position sensor is

Access Free Crank Positioning Sensor

comprised of numerous wires which run to the engine control module and crankshaft. If any of these wires were to become damaged or worn out, the engine control unit would not receive the data signal from the sensor. If you are driving your vehicle while this is happening, your engine may stall.
