Throughout World War II, when Saturday nights came around, servicemen and hostesses happily forgot the war for a little while as they danced together in USO clubs, which served as havens of stability in a time of social, moral, and geographic upheaval. Meghan Winchell demonstrates that in addition to boosting soldier morale, the USO acted as an architect of the gender roles and sexual codes that shaped the "greatest generation." Combining archival research with extensive firsthand accounts from among the hundreds of thousands of female USO volunteers, Winchell shows how the organization both reflected and shaped 1940s American society at large. The USO had hoped that respectable feminine companionship would limit venereal disease rates in the military. To that end, Winchell explains, USO recruitment practices characterized white middle-class women as sexually respectable, thus implying that the sexual behavior of working-class women and women of color was suspicious. In response, women of color sought to redefine the USO's definition of beauty and respectability, challenging the USO's vision of a home front that was free of racial, gender, and sexual conflict. Despite clashes over class and racial ideologies of sex and respectability, Winchell finds that most hostesses benefited from the USO's chaste image. In exploring the USO's treatment of female volunteers, Winchell not only brings the hostesses' stories to light but also supplies a crucial missing piece for understanding the complex ways in which the war both destabilized and restored certain versions of social order.

Whereas most crops drive farmers apart as they compete for the best prices, the price controls on tobacco bring growers together. The result is a culture unlike any other in America, one often forgotten or overlooked as federal and state governments fight over the spoils of the tobacco settlement. Tobacco Culture describes the process of raising a crop of burley from the perspective and experience of the farmers themselves. In the process of gathering information for the book, the authors performed most steps in the tobacco production process, from dropping plants, burning seedbeds, topping, and cutting to stripping and baling the finished product. Van Willigen and Eastwood document both present practices and historical developments in tobacco farming at the very moment a way of life stands poised for dramatic change. In addition to growing practices, the authors found other common threads linking growers and tobacco producing regions. Where tobacco is grown, it often becomes the major cash crop and carries the health of the economy. Farmer Oscar Richardson states, "It's bread and butter. It's the industry of the community, the state as a whole... You take tobacco out of Kentucky and this farmland wouldn't be worth a nickel." Combining cultural anthropology and oral history, John van Willigen and Susan Eastwood have created a remarkable portrait of the heart of the burley belt in Central Kentucky.
