This lively book, containing many real-life examples, makes a thoughtful, practical guide to the process of launching new ventures. It begins by introducing a model of the entrepreneurial process, and follows the model throughout the book. Emphasis is placed on the beginnings of the entrepreneurial process - particularly opportunity recognition and feasibility analysis.A four part organization makes the journey toward understanding the entrepreneur process both enjoyable and productive. The four parts, which collectively contain 15 chapters, are: The Decision to Become an Entrepreneur, Developing Successful Business Ideas, Moving From an Idea to an Entrepreneurial Firm, and Managing and Growing an Entrepreneurial Firm.For venture capitalists, investor groups, or business incubators (for-profit and not-for-profit) to distribute to their client companies; and of particular help to technology companies.

A new venture or business always stands on the precarious ground of unpredictable challenges wherein it is constantly subjected to pressures from competition and the ever changing dynamics of the market. In this scenario, a venture can only be successful, if it is guided by an entrepreneur who measures situations insightfully and calculates the risks before taking a plunge. Entrepreneurship: Creating and Leading an Entrepreneurial Organization is about creating, managing, and leading an entrepreneurial organization. The contents would help in inculcating an entrepreneurial mindset, developing entrepreneurial skills, and equipping the reader with the basic knowledge and skills for launching and managing the growth of a venture. The teaching/learning of entrepreneurship require greater focus on experiential learning. Therefore, the book extensively emphasizes on experiential learning and a hands-on approach - 'learning by doing'. Book has cited a number of examples and given cases and exercises from Indian as also global contexts to make entrepreneurship learning an enjoyable experience.

The Founder's Dilemmas examines how early decisions by entrepreneurs can make or break a startup and its team. Drawing on a decade of research, including quantitative data on almost ten thousand founders as well as inside stories of founders like Evan Williams of Twitter and Tim Westergren of Pandora, Noam Wasserman reveals the common pitfalls founders face and how to avoid them.
