learning difficulties, such as learning disabilities, and who speak English as a second language. The book can be used on its own or with companion software (purchased separately) that provides a user-friendly tool for producing psychometrically and theoretically defensible interpretations of WISC-V performance, and may be used to develop interventions based on each child's strengths and weaknesses.

American Psychological Association (APA) adopted a set of guidelines for clinical supervision for health service psychology. While technically covered by these guidelines, supervising clinical psychological assessment includes additional tasks (such as ensuring accurate administration, scoring, and interpretation of tests) and tensions. Supervisors must often instruct supervisees on the data-integration process—which can involve more direct teaching than standard clinical supervision—while encompassing the same interpersonal, therapeutic, and less structured guiding aspects as psychotherapy supervision. It is increasingly common to view clinical supervision in the assessment process and supervision of psychotherapy as two significantly different tasks. Surprisingly, there is very little training and guidance available on appropriate, effective, and beneficial methods of psychological assessment supervision. *Essentials of Psychological Assessment Supervision* seeks to remedy the lack of literature in this area, offering guidance on supervising psychological testing and assessment. This much-needed guide provides supervisors with authoritative, up-to-date information on guidelines relevant to assessment supervision. Additionally, detailed coverage of supervision of cognitive, personality/emotional, psychoeducational, neuropsychological, forensic, and therapeutic assessments, among others, provide supervisors with guidance and structure in the supervision process. Focusing on practical application, this book offers guidance on topics such as assessment models appropriate in different areas of assessment; diversity issues; evaluation and feedback of supervisee
