This compelling novel follows four women as they learn to balance children, estranged husbands, boyfriends, and problems at work through their faith in God. Michelle, Tonya, Mrs. Judson, and Miz Ida. African-American, white, rich, poor -- they seemingly have nothing in common. Yet every day they face the complex realities of twenty-first-century urban life as they

try to balance their needs with their belief in God. Through the course of a year, these women must come to terms with the past, discover their true identities, and recognize the unexpected miracles that reveal God's all-encompassing love. These four women entertain us and invite us to join in their lives. As they welcome us, they also introduce us to the men in their lives. The men play supporting roles, adding color and zest to the lives of the Cover Girls. Bishop Jakes knows the struggles real women encounter and the losses that make it difficult to

The interaction of culture and mental illness is the focus of the *Clinical Manual of Cultural Psychiatry*, which is designed to help mental health clinicians become culturally competent and skilled in the treatment of patients from diverse backgrounds. The product of

Manually nearly two decades of seminar experience, the book teaches clinicians when it is appropriate to ask "Is what I am seeing in this patient typical behavior in his or her culture?" The ability to see someone else's worldview is essential for working with ethnic minority and culturally diverse patients, and the author, who designed the course that was this handbook's precursor, has expanded the second edition to take into account shifting demographics and the changing culture of mental health treatment. The content of the new edition has been completely updated,

Expanded to include new material, and enhanced by innovative features that will prove helpful for mental health clinicians as they encounter diverse patient populations. The new chapter on women reflects the fact that mental health disparities extend beyond ethnic minorities. Women have significantly higher rates of posttraumatic stress disorder and affective disorders, for example, yet research on women has been limited largely to the relationship between reproductive functioning and mental health. Two new chapters address the alarming number

of unmet mental health needs that lesbian, gay, bisexual, and transgender patients suffer from. These chapters emphasize the need for mental health providers and policy makers to remedy these disparities. A new chapter has been added to help clinicians determine the role religious and spiritual beliefs play in psychological functioning, because religious and spiritual beliefs have been found to have both positive and negative effects on mental health. The newly introduced DSM-5® Cultural Formulation Interview (CFI) is addressed in the book's introduction and is included

Virtually all agree on the need for culture-sensitive assessment, but it has proven difficult to provide adequate services, despite good intentions and funding. Too often, clients who may have different worldview and health-illness beliefs are marginalized. For many reasons, standard assessment instruments designed, researched, and normed on a few groups in the United
