type of reducing
the projection
of the front

teeth in

patients who are
growing. What is

a functional
appliance? A

functional

appliance is a

type of brace to
correct a "Class

II" problem;

Class II

Acces PDF

Functional

Appliances are a group of bite problems where the top teeth bite in front of the lower teeth.

The Monobloc was developed by

Pierre Robin

(surgeon) in

1902 and is

considered to be

one of the first

functional

appliances in

Orthodontics.

The Monobloc was

a modification

of Ottolengui's

Acces PDF

Functional

removable plate.

In 1908, Viggo Andersen

developed the

Activator

appliance. This

was the first

functional

appliance to be

widely accepted,

especially in

Europe.
