This volume provides an introduction to the field of Global Political Economy (GPE). It explores some of the approaches that have addressed the key concerns of theorists of GPE; for example, what conditions are most conducive to the emergence of collaborative behaviour among states on economic issues, or what are the determinants of the foreign economic policies of states.

contemporary theory, first-rate introductions to particular issue areas such as trade and finance, and an extended debate on globalization that reflects a variety of perspectives.

Global Political Economy / Edition 5 by John Ravenhill ...

This chapter examines the political economy of regionalism, focusing on why regional trade agreements are established and which actors are likely to support regional rather than global trade liberalization. It also considers the effects that regionalism has had on the trade and welfare of members and non-members, as well as the relationship between liberalization at the regional and global levels.
