Derived from the renowned multi-volume International Encyclopaedia of Laws, this analysis of media law in Greece surveys the massively altered and enlarged legal landscape traditionally encompassed in laws pertaining to freedom of expression and regulation of communications. Everywhere, a shift from mass media to mass self-communication has put enormous pressure on traditional law models. An introduction describing the main actors and salient aspects of media markets is followed by in-depth analyses of print media, radio and television broadcasting, the Internet, commercial communications, political advertising, concentration in media markets, and media regulation. Among the topics that arise for discussion are privacy, cultural policy, protection of minors, competition policy, access to digital gateways, protection of journalists’ sources, standardization and interoperability, and liability of intermediaries. Relevant case law is considered throughout, as are various ethical codes. A clear, comprehensive overview of media legislation, case law, and doctrine, presented from the practitioner’s point of view, this book is a valuable time-saving resource for all concerned with media and communication freedom. Lawyers representing parties with interests in Greece will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative media law.

This book analyses the doctrinal structure and content of secondary liability rules that hold internet service providers liable for the conduct of others, including the safe harbours (or immunities) of which they may take advantage, and the range of remedies that can be secured against such providers. Many such claims involve intellectual property infringement, but the treatment extends beyond that field of law. Because there are few formal international standards which govern the question of secondary liability, comprehension of the international landscape requires treatment of a broad range of national approaches. This book thus canvasses numerous jurisdictions across several continents, but presents these comparative studies thematically to highlight evolving commonalities and trans-border commercial practices that exist despite the lack of hard international law. The analysis presented in this book allows exploration not only of contemporary debates about the appropriate policy levers through which to regulate intermediaries, but also about the conceptual character of secondary liability rules.

Although EU Member States share a tradition of regulating public broadcasting for the public interest, such regulation has been in decline in recent years. It has been challenged by the emergence of commercial television sworn to the market logic, as well as by satellite services and the Internet. EU law and policy has, under pressure from powerful global forces, abetted that decline. The question thus arises: Do cultural values still matter in European national broadcasting? This important book examines the challenges posed to public service obligations by European Union media law and policy. An in-depth analysis of the extent to which six countries (France, Germany, Greece, Italy, the Netherlands, and the United Kingdom) regulate broadcasting for the public interest reveals a range of vulnerability to national political pressures or, alternatively, to the ideology of market sovereignty. The author examines the country of origin principle and the European quota rule of the Television without Frontiers Directive, revealing the influence of European law on the definition and enforcement of programme requirements, and shows how the case law of the European Court of Justice encourages deregulation at the national level without offering adequate safeguards at the supranational level in exchange. She asks the question whether the alleged 'European audiovisual model' actually persists--that is, whether broadcasting is still committed to protecting such values as cultural diversity, the safety of minors, the susceptibility of consumers to advertising, media pluralism, and the fight against racial and religious hatred. The book concludes with an evaluation of the impact of the EU state aid regime on the licence fee based financing of public broadcasting. Despite the increasing importance of the subject, its study in a comparative context has been heretofore underdeveloped. This book fully provides that context and more, and will be of great value and interest to all parties concerned with the key role of communications in the development of European integration.

This book concentrates on the parallel evolution of debt crisis and digital communications in Greece. By examining four different online and social media platforms, it uncovers the impact of digital media on the contentious politics of crisis, as well as the impact of the political economic sphere on the formation of the Greek digital mediascape.

Douglas M. MacDowell (1931–2010) was a scholar of international renown and the articles included here cover a significant area of classical scholarship, discussing Athenian law, law-making and legal procedure, Old Comedy, comedy and law, politics and lexicography. All of these articles, published between 1959 and 2010, bear the characteristic marks of his scholarship: precision, balanced judgement, brevity and deep learning; they are rational and sober accounts of complicated and controversial issues. Many of these essays are virtually inaccessible as they were originally published in celebratory volumes or article collections which are now out of print or difficult to find outside major libraries. This collection of MacDowell’s articles will make these works available to a broad scholarly audience, and make it easier to bring this scholarship to the classroom as part of courses in Classics, ancient history, legal history and theatre studies. The volume includes a biography of MacDowell by Christopher Carey, based on the testimony of his closest colleagues and personal friends, which was presented to the British Academy.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this analysis of media law in Cyprus surveys the massively altered and enlarged legal landscape traditionally encompassed in laws pertaining to freedom of expression and regulation of communications. Everywhere, a shift

from mass media to mass self-communication has put enormous pressure on traditional law models. An introduction describing the main actors and salient aspects of media markets is followed by in-depth analyses of print media, radio and television broadcasting, the Internet, commercial communications, political advertising, concentration in media markets, and media regulation. Among the topics that arise for discussion are privacy, cultural policy, protection of minors, competition policy, access to digital gateways, protection of journalists' sources, standardization and interoperability, and liability of intermediaries. Lawyers representing parties with interests in Cyprus will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative media law.

The Oxford Handbook of Modern Greek Politics is a major new contribution to the study of contemporary European and Greek politics. This edited volume contains 43 chapters written by Greek and foreign academics foremost in their field. After an introductory section, offering a frame of analysis, the volume includes sections on political institutions, traditions and party families, political and social interest groups, policy-making and policy sectors, external relations, and Greece's most important political leaders of the period between the 1974 transition to democracy and today. It will be an invaluable reference for scholars, new and established, as well as for the informed reader around the world. This work offers the most comprehensive approach to the subject to this day. Drawing on data and analysis previously available only in national sources (Greek books, articles, and other primary and secondary sources), in combination with international data, it allows international scholars of politics, international relations, society, and economy to integrate the case of Greece in their own projects; and facilitates the search of any informed reader who seeks a reliable, updated source on Modern Greece.

Featuring specially commissioned chapters from experts in the field of media and communications law, this book provides an authoritative survey of media law from a comparative perspective. The handbook does not simply offer a synopsis of the state of affairs in media law jurisprudence, rather it provides a better understanding of the forces that generate media rules, norms, and standards against the background of major transformations in the way information is mediated as a result of democratization, economic development, cultural change, globalization and technological innovation. The book addresses a range of issues including: Media Law and Evolving Concepts of Democracy Network neutrality and traffic management Public Service Broadcasting in Europe Interception of Communication and Surveillance in Russia State secrets, leaks and the media A variety of rule-making institutions are considered, including administrative, and judicial entities within and outside government, but also entities such as associations and corporations that generate binding rules. The book assesses the emerging role of supranational economic and political groupings as well as non-Western models, such as China and India, where cultural attitudes toward media freedoms are often very different. Monroe E. Price is Director of the Center for Global Communication Studies at the Annenberg School for the University of Pennsylvania and Joseph and Sadie Danciger Professor of Law and Director of the Howard M. Squadron Program in Law, Media and Society at the Cardozo School of Law. Stefaan Verhulst is Chief of Research at the Markle Foundation. Previously he was the co-founder and co-director, with Professor Monroe Price, of the Programme in Comparative Media Law and Policy (PCMLP) at Oxford University, as well as senior research fellow at the Centre for Socio Legal Studies. Libby Morgan is the Associate Director of the Center for Global Communication Studies at the Annenberg School for the University of Pennsylvania.
