This guidebook helps child therapists understand the relationship between the identification of problem behaviors and the formulation of effective interventions. Handbook of Child Behavior Therapy instructs professionals on not only 'what we do', but also 'how to do it'. The contributors give ecological considerations prime importance, grouping behaviors into the settings where they are most likely to be assessed and treated. The volume offers a superb view of the clinical decision-making process.

psychology and how it differs from medical psychology, behavioral medicine, and clinical psychology. From the beginning, I have taken the position that any application of psychological theory or practice to problems and issues of the health system is health psychology. I have repeatedly used an analogy to Newell and Simon's "General Problem Solver" program of the late 1950s and early 1960s, which had two major functional parts, in addition to the "executive" component. One was the "problem-solving core" (the procedural competence); the other was the representation of the "problem environment.

" In the analogy, the concepts, knowledge, and techniques of psychology constitute the core competence; the health system in all its complexity is the problem environment. A health psychologist is one whose basic competence in psychology is augmented by a working knowledge of some aspect of the health system. Quite apparently, there are functionally distinct aspects of health psychology to the degree that there are meaningful subdivisions in psychological competence and significantly different microenvironments within the health system. I hesitate to refer to them as areas of
