Honda Gx 390 Engine Kickback - relatorio2018.arapyau.org.br

*The power rating of the engine indicated in this document is the net power output tested on a production engine for the engine model and measured in accordance with SAE J1349 at 3,600 rpm (net power) and at 2,500 rpm (max net torque). Mass production engines may vary from this value. Actual power output for the engine installed in the final machine will vary depending on numerous factors ...

Honda Engines

Honda ' s GC and GS engines use the world ' s first small engine internal timing belt, designed to last the lifetime of the engine. Small engine timing belts are usually external and are subject to wear caused by dirt. Honda ' s internal timing belt runs in oil, eliminating the need for conventional drive gears. This design:
