I menu di Luisanna è un florilegio delle sue ultime ricette: piatti vigliacchi, semplici e accattivanti, svelti e gustosi, alla portata di tutte le tasche e veloci, facili nella preparazione. Piatti che strizzano l'occhio e invogliano l'appassionato meno esperto di cucina, l'abbonato ai "quattro salti" (in padella o giù di lì), la sempre di fretta ma golosa e curiosa. Tanti i ghiotti menu ...

Lyrics. Sung from the perspective of a nameless resident of the area recounting the flooding of St. Bernard and Plaquemines parishes during the flood, "Louisiana 1927" features lyrics that depict the devastation of the residents of those parishes in the aftermath of the flood. In particular, the narrator lays out the widespread nature of the destruction ("river had busted through clear down to ...

This book contains the refereed proceedings of the 12th International Conference on Agile Software Development, XP 2011, held in Madrid, Spain, in May 2011. The year 2011 marked the 10th anniversary of the Agile Manifesto. In this spirit, the XP conference continued its fine tradition of promoting agility by disseminating new research results in a timely manner and by bringing together researchers and practitioners for a fruitful mutual exchange of experiences. As introduced for XP 2010, there were again two different program committees, one for research papers and one for experience reports. Regarding the research papers, 11 out of 56 submissions were accepted as full papers; and as far as the experience reports were concerned, the respective number was 4 out of 17 submissions. In addition to these papers, this volume also includes the short research papers, the abstracts of the posters, the position papers of the PhD symposium, and the abstracts of the workshops.

First published in 1991, Pellegrino Artusi's La scienza in cucina e l'arte di mangiar bene has come to be recognized as the most significant Italian cookbook of modern times. It was reprinted thirteen times and had sold more than 52,000 copies in the years before Artusi's death in 1910, with the number of recipes growing from 475 to 790. And while this figure has not changed, the book has consistently remained in print. Although Artusi was himself of the upper classes and it was doubtful he had ever touched a kitchen utensil or lit a fire under a pot, he wrote the book not for professional chefs, as was the nineteenth-century custom, but for middle-class family cooks: housewives and their domestic helpers. His tone is that of a friendly advisor – humorous and nonchalant. He indulges in witty anecdotes about many of the recipes, describing his experiences and the historical relevance of particular dishes. Artusi's masterpiece is not merely a popular cookbook; it is a landmark work in Italian culture. This English edition (first published by Marsilio Publishers in 1997) features a delightful introduction by Luigi Ballerini that traces the fascinating history of the book and explains its importance in the context of Italian history and politics. The illustrations are by the noted Italian artist Giuliano Della Casa.

The Rise of the Diva on the Sixteenth-Century Commedia dell' Arte Stage examines the emergence of the professional actress from the 1560s onwards in Italy. Tracing the historical progress of actresses from their earliest appearances as sideshow attractions to revered divas, Rosalind Kerr explores the ways in which actresses commodified their sexual and cultural appeal. Newly translated archival material, iconographic evidence, literary texts, and theatrical scripts provide a rich repertoire through which Kerr demonstrates how actresses skillfully improvised roles such as the maidservant, the prima donna, and the transvestite heroine. Following the careers of early stars such as Flaminia of Rome, Vincenza Armani, Vittoria Piissimi, and Isabella Andreini, Kerr shows how their fame arose from the combination of dazzling technical mastery and eloquent powers of persuasion. Seamlessly integrating the Italian and English scholarly literature on the subject, The Rise of the Diva is an insightful analysis of one of the modern world ’ s first celebrity cultures.

This open access volume provides for the first time a comprehensive description and scientific evaluation of underwater archaeological finds referring to human occupation of the continental shelf around the coastlines of Europe and the Mediterranean when sea levels were lower than present. These are the largest body of underwater finds worldwide, amounting to over 2500 find spots, ranging from individual stone tools to underwater villages with unique conditions of preservation. The material reviewed here ranges in date from the Lower Palaeolithic period to the Bronze Age and covers 20 countries bordering all the major marine basins from the Atlantic coasts of Ireland and Norway to the Black Sea, and from the western Baltic to the eastern Mediterranean. The finds from each country are presented in their archaeological context, with information on the history of discovery, conditions of preservation and visibility, their relationship to regional changes in sea-level and coastal geomorphology, and the institutional arrangements for their investigation and protection. Editorial introductions summarise the findings from each of the major marine basins. There is also a final section with extensive discussion of the historical background and the legal and regulatory frameworks that inform the management of the underwater cultural heritage and collaboration between offshore industries, archaeologists and government agencies. The volume is based on the work of COST Action TD0902 SPLASHCOS, a multi-disciplinary and multi-national research network supported by the EU-funded COST organisation (European Cooperation in Science and Technology). The primary readership is research and professional archaeologists, marine and Quaternary scientists, cultural-heritage managers, commercial and governmental organisations, policy makers, and all those with an interest in the sea floor of the continental shelf and the human impact of changes in climate, sea-level and coastal geomorphology.

This book examines the development of Roman temple architecture from its earliest history in the sixth century BC to the reigns of Hadrian and the Antonines in the second century AD. John Stamper analyzes the temples' formal qualities, the public spaces in which they were located and, most importantly, the authority of precedent in their designs. He also traces Rome's temple architecture as it evolved over time and how it accommodated changing political and religious contexts, as well as the affects of new stylistic influences.

An examination of Italian immigrants and their children in the early twentieth century, A New Language, A New World is the first full-length historical case study of one immigrant group's experience with language in America. Incorporating the interdisciplinary literature on language within a historical framework, Nancy C. Carnevale illustrates the complexity of the topic of language in American immigrant life. By looking at language from the perspectives of both immigrants and the dominant culture as well as their interaction, this book reveals the role of language in the formation of ethnic identity and the often coercive context within which immigrants must negotiate this process.

This book is based on the findings of a long-term (2000-2014) interdisciplinary research project of the University of Hohenheim in collaboration with several universities in Thailand and Vietnam. Titled Sustainable Land Use and Rural Development in Mountainous Areas in Southeast Asia, or the Uplands Program, the project aims to contribute through agricultural research to the conservation of natural resources and the improvement of living conditions of the rural population in the mountainous regions of Southeast Asia. Having three objectives the book first aims to give an interdisciplinary account of the drivers, consequences and challenges of ongoing changes in mountainous areas of Southeast Asia. Second, the book describes how innovation processes can contribute to addressing these challenges and third, how knowledge creation to support change in policies and institutions can assist in sustainably develop mountain areas and people ’ s livelihoods.

A rich, varied history of conquerors and colonizers which recognizes the centrality of Cyprus to the Mediterranean world.

A Little Princess is a children's novel by Frances Hodgson Burnett, first published as a book in 1905. It is an expanded version of the short story "Sara Crewe: or, What Happened at Miss Minchin's", which was serialized in St. Nicholas Magazine from December 1887, and published in book form in 1888. According to Burnett, after she composed the 1902 play A Little Un-fairy Princess based on that story, her publisher asked that she expand the story as a novel with "the things and people that had been left out before". The novel was published by Charles Scribner's Sons (also publisher of St. Nicholas) with illustrations by Ethel Franklin Betts and the full title A Little Princess: Being the Whole Story of Sara Crewe Now Being Told for the First Time
