Sixty percent of the global population will live in cities by 2030, with 90% of urban growth in the coming decades likely to occur in low- and middle-income countries.

Home—The Nature of Cities

Nature-based solutions are a consequence and cause of changing attitudes towards sustainability in cities, and their development shows that urban planning, political will, and social participation must always be intertwined to make cities a better place. Rodrigo Bellezoni and Fanxin Meng São Paulo and New Haven. On The Nature of Cities

What Can Policymakers Do to Enhance Nature-based Solutions—

The Nature of Cities is an international platform for transdisciplinary dialogue and urban solutions. We curate the sharing of diverse, transformative ideas about cities as ecosystems of people, nature, and infrastructure. We are committed to the design and creation of better cities for all: cities that are resilient, sustainable, livable, and just.

About The Nature of Cities—The Nature of Cities

The Nature of Cities offers the ecological component often missing from cultural analyses of the city and the urban perspective often lacking in environmental approaches to contemporary culture. By bridging the historical gap between environmentalism, cultural studies, and urban experience, the book makes a statement of lasting importance to the development of the ecocritical movement.

The Nature of Cities: Ecocriticism and Urban Environments—

The "city in a garden" and aspiring " city in nature " can pride itself with a number of world-acclaimed initiatives, from designing buildings with nature to pioneering a biodiversity management index and educating the public and professionals at home and abroad.

The Place of Nature in Cities: Taking Inspiration from—

Cities are small or rare in areas either of primitive, self-sufficient economy or of meager resources. As Adam Smith stated, the land must produce a surplus in order to support cities. This does not mean that all cities must be sur-rouned by productive land, since stra-tegic location with reference to cheap ocean highways may enable a city to

The Nature of Cities—JSTOR

The mission of The Nature of Cities is to curate joined conversations about urbanism across ways of knowing and modes of action. We create transdisciplinary, publicly available, and widely disseminated programs, events, knowledge, and engagements for green city making. We strive for cities worldwide that are resilient, sustainable, livable, and just.

Submit a story: Stories of the Nature of Cities—The—

At TNOC, we are very interested in imagining cities in which nature and people co-exist, cities in which the relationships between the human-made and the natural are imagined differently. There will be, at the Judging Committee's discretion, up to 6 money-winning stories: One 1st place story receives \$2,000; two 2nd place stories receive \$1,000 each; three third prize stories receive \$500 each.

Stories of The Nature of Cities 2009—Prize for urban—

CitiesWithNature, as a unique, next-generation initiative, is supporting an online community of practice, enabling learning and action around integrating nature in cities and (re)connecting people with nature. As almost half of humankind have lesser or even no options to connect with nature outdoors in these trying times, many are realising anew just how essential our connection with nature is for our own health and wellbeing, and how deeply it is longed for, once we are separated from it.

The Nature of Cities—Chauncy D. Harris, Edward L. Ullman—

Increased investment in urban nature may be another response that expands the Sanitary City. As millions of urban residents adjust to life under shelter-in-place orders, having access to urban greenspaces for fresh air and exercise has become ever more essential.

Cities Are Not to Blame for the—The Nature of Cities

The social and material production of urban nature has recently emerged as an important area in urban studies, human/environmental interactions and social studies. This has been prompted by the recognition that the material conditions that comprise urban environments are not independent from social, political, and economic processes, or from the cultural construction of what constitutes the 'urban' or the 'natural'.

In the Nature of Cities: Urban Political Ecology and the—

We know in fact that we need daily contact with the natural environment and we have to overcome this sort of bifurcation that cities and nature can't coexist. Part of our separation from nature is that we thought nature is something "over there" and where we live is not nature, and especially if we live in a cities.

The Nature of Cities—Top Documentary Films

The theoretical essays at the beginning make this book a worthy read if you're interested in urban nature/environments. For the contributors, the nature of cities is not solely the trees in the parks or the river in need of "saving" but also the city's infrastructure (bridges, buildings, drinking water systems, etc) and the commodities that make cities run.

In the Nature of Cities: Urban Political Ecology and the—

The Nature of Cities—Summit

We are the nature of cities, and the word "of" modifies nature to mean the "character" of cities, which we view through a green and blue lens. Our Summit logo, designed by Frida Larios, conveys a sense of a human connection among us as we steward nature and community in cities. The circles depicted in the logo are shared seeds, or ideas, both dispersed and gathered.
