In addition, as a father Stanley was a monster, jealously guarding his wealth from his estranged children. No one will mourn Robert Stanley, but his death raises questions. This book was inspired by people! I was amazed at how many young folk have allowed modern technology to think for them. I was taken aback at how many parents want their kids to drive but not be responsible enough to step up to the challenge of preparing for testing. This book is fun with real events that have taken place since working as a driver's license examiner! Some days were good, some were bad, and others—well, they were real bad. I thought it would be good to enlighten the kids and their parents how it looks from the other side of the wheel! I also thought this book would help the next group of young folks to prepare for their turn. It shouldn't be hard for kids already in school to study, but seeing the scores of the test, I noticed a lot of kids aren't studying, nor are they mature enough to drive. After reading this book and me driving home the fact of how important being prepared is, hopefully when you come to test, you will get the green light to proceed with caution. Enjoy!
