We are entering an empathy crisis. Most of our communication is conveyed through non-verbal cues - facial expressions, tone of voice, body language - nuances that are completely lost when we interact through our smartphones and other technology. The result is a digital universe that's emotion-blind - a society lacking in empathy. Rana el Kaliouby discovered this when she left Cairo, a newly-married, Muslim woman, to take up her place at Cambridge University to study computer science. Many thousands of miles from home, she began to develop systems to help her better connect with her family. She started to pioneer the new field of Emotional Intelligence (EI). A Simple system to help your team execute better and faster All growing companies encounter ceilings of complexity, usually when they hit certain employee or revenue milestones. In order to burst through ceiling after ceiling and innovate with growth, a company must develop a reliable system that prompts leaders to be proactive and pivot when the need arises. Drawing on his experience as a successful serial entrepreneurial and speaker, author Patrick Thean demonstrates how to identify the signs of setbacks before they occur, track those signs, and make adjustments to keep your plan on track and accelerate growth. Thean introduces a simple system to empower everyone in your company to be focused, aligned, and accountable, a three-rhythm process for effective execution: • Think Rhythm: A rhythm of strategic thinking to keep your teams focused and working on the future of your business. • Plan Rhythm: A rhythm of planning that will allow you to choose the right priorities and get your departments or divisions aligned with those priorities. • Do Rhythm: A rhythm of executing your plan and making effective and timely adjustments every week. Thean's process applies to any growing business and ensures that your organization gets into the habit of achieving success, week after week, quarter after quarter, year after year.

This unique reference utilizes techniques based on other management measurement systems, such as the balanced scorecard. It also presents a maturing of measurement technique for maintenance and asset maintenance and development techniques allowing companies to be competitive into the future.
