Solve Equations Answer

$y = \log_b x$. Then the logarithmic

Read Online Logarithmic Properties Solve Equations Answer Key

function is given by; $f(x) = \log_b x = y$, where b is the base, y is the exponent and x is the argument. The function $f(x) = \log_b x$ is read as “log base b of x .”. Logarithms are useful in mathematics because they enable us to perform calculations with very large numbers.

Problem 2: Solve for x in the equation
Answer: is the exact answer and
 $x=10.5427684616$ is an approximate answer. Solution:

SOLVING LOGARITHMIC EQUATIONS

$\log_b(0) = \text{undefined}$. $\log_b(0) = \text{undefined}$.

Read Online Logarithmic Properties Solve Equations

{undefined} $\log_b . (0) = \text{undefined}$.

Now, let 's check our answer if. $x = 7$.

$x = 7$ $x = 7$ is a valid solution.

Substitute back into the original logarithmic equation and verify if it yields a true statement. Yes!

Answer as appropriate, these answers will use 6 decimal places. $x = 5.271 \times 10^{-384}$
Solve for x by adding 1 to each side and then dividing each side by 4.
 $x = 5.271 \times 10^{-384}$ Check the answer; this is an acceptable answer because we get a positive number when it is plugged back in .
