Revised and featuring a new foreword by the author, this uncompromising novel returns, more powerful than ever: "A portrait of a country ravaged by vendetta and graft, its public spaces loud with the complaints of religious bigots and its private spaces cradling unspeakable pain." (Hilary Mantel, New York Review of Books) An Obedient Father introduced one of the most admired voices in contemporary fiction. Set in Delhi in the 1990s, it tells the story of an inept bureaucrat enmired in corruption, and of the daughter who alone knows the true depth of his crimes. Decried in India for its frank treatment of child abuse, the novel was widely praised elsewhere for its compassion, and for a plot that mingled the domestic with the political, tragedy with farce. Yet, as Akhil Sharma writes in his foreword to this new edition, he was haunted by what he considered shortcomings within the book: almost twenty years later, he returned to face them. Here is the result, a leaner, surer version with even greater power.

Compact Utility Tractors, or CUTs, are cute little cutters! As farming became more refined so did the needs of tractors. The answer was a smaller, more maneuverable and fuel-efficient tractor with a variety of implements and attachments. With this focus on special needs, attachments became available such as plows, disc harrows, mower decks, cultivators, spreaders, snowblowers, and more. They have become a necessary utility for farmers, orchards, small construction jobs, and landscaping/maintenance for estates, parks and golf courses. At the forefront of this evolution was the Farmall Cub and John Deere Model L. Then came the Japanese invasion; a new kind of tractor by companies such as Yanmar and Kubota. These four-wheel drive machines were rugged and tough and used a variety of hydraulically powered attachments. American companies like John Deere, International Harvester, and Massey Ferguson built their own their own four-wheel versions. Today's

compact tractors, such as the Kubota BX series, Massey Ferguson's GC series, and the John Deere 3000, offer an even larger selection of implements for special purposes.

This bulletin provides principles, practices and procedures for testing machines and also determines aspects of a machine's performance that can be evaluated. It is directed towards those involved in the evaluation of machinery, and primarily towards users on small farms. Evaluation of farm equipment may be appropriate at any stage in its development, from first prototype to batch and series production.

This book presents an analysis of the correlation between the mind and the body, a complex topic of study and discussion by scientists and philosophers. Drawing largely on neuroscience and philosophy, the author utilizes the scientific method and incorporates lessons learned from a vast array of sources. Based on the most recent cutting-edge scientific discoveries on the Mind-Body problem, Tomasi presents a
