Deborah Manley's selection of extracts reveals how generations of writers have viewed the landscapes of Malta and Gozo, the people of the islands, the splendours of Valletta and its famous harbour, and the celebrated festas, the village festivals that celebrate the island's Catholic identity. An introduction places these extracts in context, while the anthology also considers how Maltese writers have imagined and depicted their homeland.

This book provides new dimensions and a contemporary focus on sustainable transport, urban regeneration and development in eight countries spanning four continents at different stages of development. It examines the role of transit oriented development (TOD) in improving urban sustainability and providing different transport choices, exploring how these can be implemented in modern cities.

Inspiring photography, insider tips, cultural interpretation, and expert advice are hallmarks of these bestselling travel guides, ensuring a more authentic, enriching experience of the destination. The Eternal City, with its almost three thousand years of history, bears witness to the genius, the tenacity, and the versatility of a people and a civilization. History and culture, monuments and curiosities, art and tradition. Thanks to a series of recommended itineraries, the reader will be able to explore even hidden corners of the city, taking advantage of the practical information provided. From Piazza di Spagna to the heights of the Palatino, the expert authors guide readers through this vibrantly historical city, offering all the tools needed for planning a trip to this fascinating capital. Starting with an introduction to the history and the culture of Rome, the book explores each and every district of the city, covering every corner in detail. The sites described include the Coliseum, the Arco di Costantino, the Foro Imperiale, the Foro Romano, the Trevi fountain, and the sublime ceiling of the Sistine Chapel in the Vatican Museums. Moreover, the guide presents six detailed guided walks through one of the most charming districts of the city.

Carry the world in your pocket with this fully updated fifth edition of Atlas A-2, an invaluable global guide combining maps, facts, and statistics.

Volume 99 is a collection of theoretical and empirical studies in governance and regulation, with application to both macro and microeconomic issues.

" As a result of changes in the composition of the population, society changes continuously with respect to various factors including age-structure, family composition and the availability of energy. Changes lead to situations that are reflected in the commissioning of buildings, which is gradually shifted from new construction to the reuse and renovation of existing buildings. The adaptation of buildings often requires the modification of facades and the construction behind. The scope of this action within the COST Transport and Urban Development Domain is to improve techniques and methods for envelopes of buildings constructed during the last half of the 20th century in the COST countries. In other words it is directed on the building envelopes of the so-called non-traditional buildings. This publication is based on a support by COST, an intergovernmental European framework for international cooperation between nationally funded research activities. COST creates scientific networks and enables scientists to collaborate in a wide spectrum of activities in research and technology. "
