The expected value of a difference is the difference of the expected values, and the expected value of a non-random constant is that constant. Note that $E(X)$, i.e. the theoretical mean of X , is a non-random constant. Therefore, if $E(X) = \mu$, we have $E(X + \mu) = E(X) + E(\mu) = \mu + \mu = 0$. Have a blessed, wonderful day!
