Exclusion applications may only be submitted by the Province, local governments, First Nation governments, and other prescribed bodies who own the land under application pursuant to s. 29 (1) (a) of the ALC Act.

Application Instructions - ALC - Agricultural land

Agricultural soil science studies the chemical, physical, biological, and mineralogical composition of soils as they relate to agriculture. Agricultural soil scientists develop methods that will improve the use of soil and increase the production of food and fiber crops. Emphasis continues to grow on the importance of soil sustainability.

Agricultural soil science - Wikipedia

Although most research is directed towards the application of biochar to soils, there are several other biochar properties that render it a suitable candidate for non-soil applications. A growing number of studies have tested biochar as a composite in building materials, as a hazardous substance adsorbent in drinking water and wastewater, and as a component in filters for indoor air quality and storm water management.
