by globalization and their effective management. It shows how the dynamics of turbo-charged globalization has the potential and power to destabilize our societies. Drawing on the latest insights from a wide variety of disciplines, Ian Goldin and Mike Mariathan provide practical guidance for

# File Type PDF

## November 2013

how governments, businesses, and individuals can better manage globalization and risk. Goldin and Mariathasan demonstrate that systemic risk issues are now endemic everywhere—in supply chains, pandemics, infrastructure, ecology and climate change, economics, and politics.

File Type PDF

November 2013

Unless we address these concerns, they will lead to greater protectionism, xenophobia, nationalism, and, inevitably, deglobalization, rising inequality, conflict, and slower growth. The Butterfly Defect shows that mitigating uncertainty and risk in an interconnected world is an essential task for

Biology Ib  
Paper 3 Tz0  
News from the year at  
Malvern College

“ Top agricultural scientists from around the world have taken up the challenge of sustainable agriculture, with the specific focus on integrating agronomic, climatological,

# File Type PDF

## November 2013

biophysical and socio-economic perspectives and processes. Every chapter (of the Handbook) contributes to addressing the growing food-security challenges facing the world. ” Foreword by Jeffrey Sachs, Director of the Earth Institute at Columbia University

Climate effects on agriculture are

File Type PDF

November 2013

of increasing concern in both the scientific and policy communities because of the growing population and the greater uncertainty in the weather during growing seasons.

Changes in production are directly linked to variations in temperature and precipitation during the growing season and

# File Type PDF

## November 2013

often to the offseason changes in weather because of soil water storage to replenish the soil profile. This is not an isolated problem but one of worldwide interest because each country has concerns about their food security. The

Agricultural Model  
Intercomparison and  
Improvement Project

File Type PDF

November 2013

(AgMIP) was developed to evaluate agricultural models and intercompare their ability to predict climate impacts. In sub-Saharan Africa and South Asia, South America and East Asia, AgMIP regional research teams (RRTs) are conducting integrated assessments to improve understanding of

microcephaly, as well as  
due to its association  
with neurological  
disorders such as  
Guillain-Barré  
syndrome in adults  
(PAHO, 2017). In the

File Type PDF

November 2013

framework of this global response and multistrategic approach, the purpose of this Research Topic is to provide updated information and novel researches about control strategies, encompassing virological, entomological and epidemiological data, in order to reach the triad of protagonists of

# File Type PDF

## November 2013

transmission cycles  
(virus, mosquitoes and  
humans).

The American economy faces two deep problems: expanding innovation and raising the rate of quality job creation. Both have roots in a neglected problem: the resistance of Legacy economic sectors to innovation.

# File Type PDF

## November 2013

While the U.S. has focused its policies on breakthrough innovations to create new economic frontiers like information technology and biotechnology, most of its economy is locked into Legacy sectors defended by technological/ economic/ political/ social paradigms that

# File Type PDF

## November 2013

block competition from disruptive innovations that could challenge their models. Americans like to build technology "covered wagons" and take them "out west" to open new innovation frontiers; we don't head our wagons "back east" to bring innovation to our Legacy sectors. By failing to do so, the economy misses a major

File Type PDF

November 2013

opportunity for  
innovation, which is the  
bedrock of U.S.

competitiveness and its  
standard of living.

Technological  
Innovation in Legacy  
Sectors uses a new,  
unifying conceptual  
framework to identify  
the shared features  
underlying structural  
obstacles to innovation  
in major Legacy sectors:

# File Type PDF

## November 2013

energy, air and auto transport, the electric power grid, buildings, manufacturing, agriculture, health care delivery and higher education, and develops approaches to understand and transform them. It finds both strengths and obstacles to innovation in the national innovation

# File Type PDF

## November 2013

environments - a new concept that combines the innovation system and the broader innovation context - for a group of Asian and European economies. Manufacturing is a major Legacy sector that presents a particular challenge because it is a critical stage in the innovation process. By increasingly

# File Type PDF

## November 2013

offshoring production,  
the U.S. is losing  
important parts of its  
innovation capacity.

"Innovate here, produce here," where the U.S. took all the gains of its strong innovation system at every stage, is being replaced by "innovate here, produce there," which threatens to lead to "produce there, innovate there."

# File Type PDF

## November 2013

To bring innovation to Legacy sectors, authors William Bonvillian and Charles Weiss

recommend that policymakers focus on all stages of innovation from research through implementation. They should fill institutional gaps in the innovation system and take measures to address structural obstacles to

# File Type PDF

## November 2013

needed disruptive innovations. In the specific case of advanced manufacturing, the production ecosystem can be recreated to reverse "jobless innovation" and add manufacturing-led innovation to the U.S.'s still-strong, research-oriented innovation system.
