This CIGRE Green Book provides the entire know-how about switches in a high voltage system. The switching equipment includes circuit breakers, vacuum interrupters, disconnecting switches, and earthing switches used in AC & DC transmission and distribution systems. The Green book describes different switching equipments and their roles in the power systems. It explains the fundamental switching behaviors in power systems targeted for practitioners and students and joining electrical industries. The Green book also covers fundamental specific subjects including DC circuit breakers, controlled switching, fault current limiting devices and future technologies. Like all Green books, this book covers the cumulative understanding of numerous experts in the CIGRE study committee. It offers the approved and outstanding practical knowledge of CIGRE Study committee A3 and was collected by Dr. Hiroki Ito.

Adam Osidis and the Mosak come to a crossroads. The choices they make here will echo throughout the lands of Zhal for all eternity.

Some say that private law ought to correct wrongs or to protect rights. Others say that private law ought to maximise social welfare or to minimise social cost. In this book, Emmanuel Voyiakis claims that private law ought to make our responsibilities to others depend on the opportunities we have to affect how things will go for us. Drawing on the work of HLA Hart and TM Scanlon, he argues that private law principles that require us to bear certain practical burdens in our relations with others are justified as long as those principles provide us with certain opportunities to choose what will happen to us, and having those opportunities is something we have reason to value. The book contrasts this 'value-of-choice' account with its wrong- and social cost-based rivals, and applies it to familiar problems of contract and tort law, including whether liability should be negligence-based or stricter; whether insurance should matter in the allocation of the burden of repair; how far private law should make allowance for persons of limited capacities; when a contract term counts as 'unconscionable' or

'unfair'; and when tort law should hold a person vicariously liable for another's mistakes.

Celebrate baby girls everywhere! In the tradition of best-selling GLOBAL BABIES, GLOBAL BABY GIRLS shines a spotlight on girls from around the world, celebrating their strength, diversity, and potential. Babies love to look at babies and this bright collection of photos is a ticket to an around-the-world journey. From Peru to China, Russia to Mali, this board book features captivating photographs of curious, joyful, and adventurous baby girls from fifteen different cultures. The bright and bold pictures paired with simple text share a powerful message: no matter where they are born, baby girls can grow up to change the world. A perfect baby shower gift or first book for the toddler in your life. Part of the proceeds from this book's sales will be donated to the Global Fund for Children to support innovative community-based organizations that provide opportunities for girls to grow, thrive, and be strong.

The Sorcery Club San Francisco is in the grip of an economic collapse, and three clerks find themselves on the verge of starvation until one of them discovers a strange old book in a junk shop. The book dates back several hundred years, and is an account of the history of the lost civilization of Atlantis and a practical guide to Atlantean black magic. By means of this tome they make contact with mysterious entities, who offer them a pact - if the three of them can abstain from marriage and from quarrelling with one another for a period of time they will have a succession of powers granted to them and of they hold to this compact for the full period they will have all of those powers for the remainder of their lives. If they break the pact they must however accept the consequences.

Shows how a dramatics program need not be costly in time and money, and can start small and grow as needed. Any library or classroom can enjoy a successful program by simply selecting ideas in the volume and adapting them to the needs, abilities, and interests of the students.

This book looks at entrepreneurship and innovation as ways out of the economic crisis in Europe and other regions, and examines the main theoretical issues and practices related to this analysis. The

volume addresses such questions as: From an institutional perspective, how do economic crisis conditions affect different types of entrepreneurs and entrepreneurship? Is it useful for public policymakers and entrepreneurs to understand the basic characteristics of entrepreneurial activity, relations between the institutional environment and entrepreneurship and among entrepreneurship, innovation and social change? Featuring case studies from several industries and countries, and a variety of methodological, theoretical, and empirical approaches, the authors build a compelling narrative on the dynamics of entrepreneurship and innovation as drivers of economic growth and organizational renewal. They demonstrate that the strategic and operational relationships that entrepreneurship creates within and outside the enterprise are a fundamental route for leading and mobilizing economic and social resources that permit innovation at the organizational level and in relationships with suppliers, customers, and other stakeholders - in turn, enabling technological innovation, creating new revenue streams through new productive activities and new demand, and ultimately facilitating emergence from economic crisis. The authors consider social, gender, and generational aspects of entrepreneurship, as well as the institutional conditions necessary to promote entrepreneurial activity.
