Clare Goldsberry | Oct 07, 2020. Sweden's Perstorp Holding AB is launching the first partly renewable carboxylic acid, 2-Ethylhexanoic Acid (2-EHA) Pro, based on 25% renewable raw materials, and Valeric Acid Pro, which contains 20% renewable content. The renewable material consists of biogas; natural gas is replaced using the mass balance concept. Users can expect the same quality as the existing 2-EHA and Valeric acid, with the additional benefit of a lower carbon footprint.

Perstorp Introduces World's First Renewable Oxo Products ...
