~~Forensic Science—Mr. Izadi's SMSA Science~~
These task cards are a tool to help students review knowledge on different types of blood spatter found at a crime scene and what kind of information that blood can tell us! The task cards include the following concepts:- Passive, transfer and projectile spatter- High, medium, low velocity spatter-

~~Blood Spatter Worksheets & Teaching Resources | Teachers—~~
The unique arrangement of the blood spatter can tell a story. Blood spatter is just a collection of blood spots that may be different sizes and shapes formed by a variety of methods. Blood will spatter when an outside force breaks the surface tension of a blood drop. In other words, blood will not spatter until it hits a surface. Blood spatter is typically in the shape of an ellipse (a closed plane curve like an oval or circle).

~~Blood spatter lab—angle of impact.docx—Materials—~~
Blood evidence review worksheet Name: ____ Hand in on test day for 2 marks ... , the hospital staff knows that he has AB- blood type. Answer the following questions. a. List the antigens founds on his blood cells? A & B antigen ... What are the 4 different basic blood spatter patterns? Passive stain, angle, different textures, and trauma (spatter)

~~Blood review worksheet-KEY—soiyeung.com~~
1.1.6 Blood Spatter Introduction : If two similar-sized blood droplets fall from different heights, the resulting stains will have different sizes. Therefore, the height from which a blood droplet falls can be determined based on the size of the bloodstain. Anna's blood spatters found at the crime scene were from an angle of 90 degrees.

~~1-1-6 Blood Spatter—Principles of Biomedical Sciences~~
Blood spatters are when blood drops hit the surface at hand at a certain angle creating a splat in a certain shape. Different angles create different shapes. We had to discover how height effects the size of blood spatters and from what height did the blood drop from.

~~1-1-6 Blood Spatters—BiomedicalSciences~~
List the components of human blood. Identify the mechanisms by which blood spatter patterns are created. Describe how the surface texture of an object affects the shape of individual bloodstains. Describe the directly propor tional relationship between stain diameter and dropping height. Create and interpret transfer patterns.
