Schizotypy and Schizophrenia: The View from Experimental ...

Schizotypy is a set of traits analogous with the symptoms of schizophrenia. This article explores their putative role in the creative process, arguing that any relationship with creativity is complex and potentially bidirectional, where positive symptoms (e.g., pseudo-hallucinations) may be associated with factors that facilitate creativity (e.g. cognitive disinhibition) while negative schizotypy (e.g. anhedonia) inhibits creativity.
