As the Baby Boomers age, concerns over healthcare systems abilities to accommodate geriatric patients grow increasingly challenging. The increased life expectancy of the population since the early 1900s had been built on the improvement of living conditions, diet, public health and advancement in medical care. With this we have seen a steady decline in the age-specific prevalence of vascular and heart diseases, stroke and even dementia. In addition, societies worldwide struggle to develop a large enough workforce to treat aging patients, which forces geriatric patients to rely on physicians in a wide array of specialties that are often not trained for their demographic. These trends have created a tremendous need for trustworthy resources, yet with regard to hypotensive syndromes, nothing of this nature exists. Hypotensive syndromes represent a heterogenous group of disease states. Hypotensive syndromes are characterized by low blood pressure following postural changes, meals and neck turning. These are common conditions seen in the elderly and could be due to blood pressure dysregulation. These syndromes frequently cause dizziness, syncope and falls in the elderly as well as a resultant decrease in function, and they are frequently mistaken for other conditions. This is especially true among physicians who are not trained to consider the unique needs of an aging patient. The proposed book is designed to present a comprehensive approach to the management of hypotensive syndromes in the elderly. Currently there are no guidelines or good resource to guide about these conditions. This book will also discuss the challenges of diagnosis and management of these conditions. The text introduces the concepts to set a clear foundation before covering the syndromes as they present in other comorbidities, including diabetes, heart failure, and a wide array of serious conditions that are common in older patients. As the Baby Boomers continue to age, this text will prove a vital resource for a wide array of specialties that will be increasingly critical to meeting their needs.

Hidden in the mountains of East Tennessee, an eleven-year old goes about the business of being a boy during the summer of 1970. Within a balance of terror and innocence, he bears silent witness to ghosts of the dead and the cruelties of a teenage killer while local justice plays out in a community carved from legacies of coal mining and religion.

The Only Question Is Will Their Love Survive? When Sara and Jacob find out they ' re pregnant with a baby boy, nothing could make them happier. They were your typical expecting parents - deeply in love, deliriously excited to be starting a family. However, their hopes are dashed when the doctor gives a recommendation for Sara to take an AFT. Five words change their destiny forever... " Your son has Trisomy 21 " Their perfect love story unexpectedly spirals into panic, and their dream shatters with it — devastating Sara. Jacob, confused and troubled with the situation, tries to prompt Sara into following the doctor ' s suggestion: terminate the pregnancy; assuring her that they can try again, Sara angry at even the thought of destroying the life inside of her, rejects him. Their love, marriage and future suddenly start to fall apart; sending them both on very different journeys... Chapter 1 - Bacon Sara stared out the window in awe. The branches of the trees in the backyard swayed back and forth in the light breeze, the sun ' s rays piercing through the leaves causing shadows to dance across the wilted grass. Sara practically floated around the kitchen in her excitement which filled the room along with the smell of the sizzling bacon she was cooking. After years of being married, Sara knew exactly how to rouse her husband from sleep, and she knew that the aroma would eventually coax him out of bed. Elated, she let out a girlish laugh. Today is going to be perfect, she thought. Sizzling and crackling sounds from the frying bacon echoed from the kitchen. She was certain that last pop would have woke him up but she didn ' t care because she was having too much fun. She let her hand rest on her pregnant belly, patting it affectionately. " I hope you like it out here, " she murmured to herself and as if on cue, she felt a tiny flutter in her stomach. Being pregnant was unlike any other chapter of her life, she had never felt more purposeful. She felt like a mess of contradictions. Completely afraid and simultaneously stronger than ever. Powerful, yet unattractive but her mother-in-law had assured her that it was all just the hormones. It didn ' t stop her from feeling like a thanksgiving turkey, although she did appreciate everyone ' s attempt at making her feel better. It wasn ' t long before Jacob ' s head peeked around the corner, sleepy eyed and resembling more of a toddler than a grown man. His golden hair was creased in the middle, pointing up on one side and flattened on the other. He flashed a smile at her, " What ' s all this? " She chuckled, " You have some serious bed head Mr. Michaels. " Without a word he came up behind her, wrapping his arms around her waist and placing his hands on her stomach. " Should you really be standing up for such a long time, Mrs. Michaels? " " I ' m fine Jacob, " she replied. " Besides the doctor said walking is healthy for me and the baby, so standing shouldn ' t hurt. " She laughed patting his cheek playfully. He left a butterfly kiss where her fingers brushed against his lips. " Well, if physical activity is helpful... " Her grin gave way to a full smile as she reached back to swat him. After a short pause he continued, " Seriously, do you know what would make this day better? " She raised her eyebrow, expecting him to say something suggestive (which was typical of him). He spun her around in his arms so that she was facing him, her belly protruded slightly between them making him hold her awkwardly but he went on pretending she didn ' t notice. " I was just going to say, what would make this day better..." he trailed off looking deeply into her eyes. " is finding out we ' re having a boy today. " She let out a bark of laughter " Really, that ' s not where I thought you were going with that. "

If you think that getting creative with Excel means the underhanded tweaking of numbers, think again. Excel Hacks shows even the most experienced users how to do things with Excel they might never have thought of doing--and lets them have a little fun while they're at it.Microsoft Excel is not just the dominant spreadsheet in the world; it's also one of the most popular applications ever created. Its success lies not only in its power and flexibility, but also in its streamlined, familiar interface that casually conceals its considerable capabilities. You don't need to know everything that Excel can do in order to use it effectively, but if you're like the millions of Excel power users looking to improve productivity, then Excel Hacks will show you a wide variety of Excel tasks you can put to use, most of which are off the beaten path.With this book, Excel power users can bring a hacker's creative approach to both common and uncommon Excel topics--"hackers" in this sense being those who like to tinker with technology to improve it. The "100 Industrial Strength Tips and Tools" in Excel Hacks include little known "backdoor" adjustments for everything from reducing workbook and worksheet frustration to hacking built-in features such as pivot tables, charts, formulas and functions, and even the macro language.This resourceful roll-up-your-sleeves guide is for intermediate to advanced Excel users eager to explore new ways to make Excel do things--from data analysis to worksheet management to import/export--that you never thought possible. Excel Hacks will help you increase productivity with Excel and give you hours of "hacking" enjoyment along the way.

Created pure and innocent, the newborn angel Fae's only crime is loving the mortal realm too much. She wants to see, to touch, to taste...and to know. All of which leads to her fall from grace when she meets the demon brothers who give her all she desires. Cravis and Travis toy with the young angel out of boredom, but losing her awakens something inside them that they didn't know they could still feel. While Travis begins to learn how precious a life can be, Cravis struggles with the fear of how fragile love is, not sure if he can go through it being taken from him once again. The demons will claim the angel, but many dangers threaten the Fallen. Hunted by the Virtues and lusted after by the damned, Fae may be protected as a cherished pet. But she will soon learn she's worth so much more.

This volume contains the proceedings of the workshop on Optimization Theory and Related Topics, held in memory of Dan Butnariu, from January 11-14, 2010, in Haifa, Israel. An active researcher in various fields of applied mathematics, Butnariu published over 80 papers. His extensive bibliography is included in this volume. The articles in this volume cover many different areas of Optimization Theory and its applications: maximal monotone operators, sensitivity estimates via Lyapunov functions, inverse Newton transforms, infinite-horizon Pontryagin principles, singular optimal control problems with state delays, descent methods for mixed variational inequalities, games on MV-algebras, ergodic convergence in subgradient optimization, applications to economics and technology planning, the exact penalty property in constrained optimization, nonsmooth inverse problems, Bregman distances, retraction methods in Banach spaces, and iterative methods for solving equilibrium problems. This volume will be of interest to both graduate students and research mathematicians.
