The activities in Geometry and Measurement are based on an Olympic theme, so students discover interesting facts about Olympic athletes from the first Olympic runners to Michael Johnson while they learn how to solve maths problems. Students will sharpen numerous skills, including how to: identify points, lines and planes, identify and name angles, identify properties and parts of a circle, determine the circumference of circles, identify similar and congruent figures, identify congruent triangles and other polygons, recognise and define space figures, identify and use units of measurement and find perimeter, area and volume.

Exercises allow students to study the past of the global community and sharpen numerous skills.

In this book, students build on their basic map skills while solving exciting mysteries in places all over the world.

25 reproducible tests covering: science concepts & processes; life science; human body & health; physical science; earth space & science; keeping track of skills. Includes answer keys.

Exercises emphasizing problem-solving strategies necessary to

This set of standards-based reproducible activity pages is basic, not boring. In this book, students tour the American government and economy with a sassy American eagle named Egbert. They'll review important facts about the structure of the government, the workings of the economy, and the rights and responsibility of citizens. An assessment, glossary, and helpful lists are included.

The second edition of this best-selling Python book (over 500,000 copies sold!) uses Python 3 to teach even the technically uninclined how to write programs that do in minutes what would take hours to do by hand. There is no prior programming experience required and the book is loved by liberal arts majors and geeks alike. If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In this fully revised second edition of the best-selling classic Automate the Boring Stuff with Python, you'll learn how to use Python to write programs that do in minutes what would take you hours to do by hand--no prior programming experience required. You'll learn the basics of Python and explore Python's rich library of modules for performing specific tasks, like

scraping data off websites, reading PDF and Word documents, and automating clicking and typing tasks. The second edition of this international fan favorite includes a brand-new chapter on input validation, as well as tutorials on automating Gmail and Google Sheets, plus tips on automatically updating CSV files. You'll learn how to create programs that effortlessly perform useful feats of automation to:

- Search for text in a file or across multiple files
- Create, update, move, and rename files and folders
- Search the Web and download online content
- Update and format data in Excel spreadsheets of any size
- Split, merge, watermark, and encrypt PDFs
- Send email responses and text notifications
- Fill out online forms

Step-by-step instructions walk you through each program, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. Learn how in *Automate the Boring Stuff with Python, 2nd Edition*.
