The Basics Of Permaculture Design

What is permaculture? Permaculture is a design approach based on understandings of how nature works. At its heart permaculture has three ethics: Earth Care; People Care; Fair Shares; This makes permaculture a unique toolkit that is used to design regenerative systems at all scales - from home and garden to community, farms and bioregions around the world.

| Permaculture Association

Permaculture comes from 'permanent agriculture' and 'permanent culture'. As an approach it is about living lightly on the planet and making sure that we can sustain human activities for many generations to come. Permaculture combines three key aspects: an ethical framework, understanding of how nature works, and a design approach.

The Basics of Permaculture Design : Ross Mars : 9781856230230

Permaculture is a way to design human habitats. It's a design system that gives us tools and a framework to make decisions. In permaculture, we design a big picture, and we think about everything we need and all the systems we rely on for survival. Another way I can describe it is that permaculture is how to create your own paradise.
