The Challenges of Urban Ecological Sanitation: Lessons ...

Sanitation solutions are needed that are safe for the user and interlinked with other urban services which can treat waste as a resource. The Challenges of Urban Ecological Sanitation describes an attempt to create modern, multi-storey urban dwellings that incorporate ecological sanitation into their design resulting in a clean living space and deriving safe agricultural inputs from human organic waste.

The Challenges of Urban Ecological Sanitation

The Challenges of Urban Ecological Sanitation describes the technical design, daily operation and maintenance, costs and benefits compared to conventional systems, as well as the challenges in achieving acceptability with users. It includes technical information and illustrations, but also stresses the institutional structure needed to support ...

The Challenges of Urban Ecological Sanitation: Lessons ...

Grand challenges in urban ecology, Diane E. Pataki \*. Department of Biology, University of Utah, Salt Lake City, UT, USA. The field of urban ecology has seen a major expansion in the last two decades. As the world rapidly urbanizes, human settlements constitute one of the few ecosystems on earth that are significantly increasing in their extent. As a result, interest from both the scientific community and society at large has turned its attention to the functioning of cities and their ...

(2008) characterized the challenges urban ecologists face: “urban ecosystems are complex, dynamic biological–physical–social entities, in which spatial heterogeneity and spatially localized feedbacks play a large role”. Addressing such challenges requires interdisciplinary thinking and, depending on the goals of a project,

CONCEPTS AND QUESTIONS Urban ecology: advancing science ...

Abstract. Worldwide cities are rapidly expanding, creating visible environmental and social challenges. The generation of waste is one of the central concerns in urban agglomerations, particularly in the global South, where inadequacies, absences and weaknesses shape the local waste management system.
