New York Times Bestseller: This life story of the quirky physicist is \(\text{la} \) a thorough and masterful portrait of one of the great minds of the century\(\text{l} \) (The New York Review of Books). Raised in Depressionera Rockaway Beach, physicist Richard \(\text{Page 27/51} \)

Feynman was irreverent, eccentric, and childishly enthusiastic a new kind of scientist in a field that was in its infancy. His quick mastery of quantum mechanics earned him a place at Los Alamos working on the Manhattan Project under J. Robert Oppenheimer, where the giddy young man held his own among the nation s greatest Page 28/51

minds. There, Feynman turned theory into practice, culminating in the Trinity test, on July 16, 1945, when the Atomic Age was born. He was only twenty-seven. And he was just getting started. In this sweeping biography, James Gleick captures the forceful personality of a great man, integrating FeynmanIs work and life in a Page 29/51

way that is accessible to laymen and fascinating for the scientists who follow in his footsteps.

One of the most famous science books of our time, the phenomenal national bestseller that "buzzes with energy, anecdote and life. It almost makes you Page 30/51

want to become a physicist" (Science Digest). Richard P. Feynman, winner of the Nobel Prize in physics, thrived on outrageous adventures. In this lively work that I can shatter the stereotype of the stuffy scientist (Detroit Free Press), Feynman recounts his experiences trading ideas on atomic physics with Einstein and Page 31/51

cracking the uncrackable safes guarding the most deeply held nuclear secrets and much more of an eyebrow-raising nature. In his stories, Feynman Is life shines through in all its eccentric glory a combustible mixture of high intelligence, unlimited curiosity, and raging chutzpah. Develop the Skills to Learn Anything Faster, Easier, and More Effectively Written by the creators of the #1 bestselling course of the same name, this book will teach you how to "hack" your learning, reading, and memory skills,

Page 33/51

empowering you to learn everything faster and more effectively. What Would You Do If You Could Learn Anything 3 Times Faster?In our rapidly changing and information-driven society, the ability to learn quickly is the single most important skill. Whether you're a student, a professional, or simply embarking on a Page 34/51

new hobby, you are forced to grapple with an every-increasing amount of information and knowledge. We've all experienced the frustration of an ever-growing reading list, struggling to learn a new language, or forgetting things you learned in even your favorite subjects. This Book Will Teach You 3 Major Skills: Speed reading with Page 35/51

high (80%+) comprehension and understandingMemory techniques for storing and recalling vast amounts of information quickly and accuratelyDeveloping the cognitive infrastructure to support this flood of new information long-termHowever, the SuperLearning skills you'll learn in this Page 36/51

course are applicable to many aspects of your every day life, from remembering phone numbers to acquiring new skills or even speaking new languages. Anyone Can Develop Super-Learning SkillsThis course is about improving your ability to learn new skills or information quickly and effectively. We go far beyond the Page 37/51

kinds of "speed reading" (or glorified skimming) you may have been exposed to, diving into the actual cognitive and neurological factors that make learning easier and more successful. We also give you advanced memory techniques to grapple with the huge loads of information you'll soon be able to process. "This book Page 38/51

should be the go-to reference for anyone looking to upgrade their mind's firmware!" -Benny Lewis, Language Learning Expert Learn How to Absorb and Retain Information in a Whole New Way - A Faster, Better Way The Authors' Proprietary Method for Teaching Speed Reading & Memory Improvement You Page 39/51

may have even taken a normal speed reading course in the past, only to realize that you didn't retain anything you read. The sad irony is that in order to properly learn things like speed reading skills and memory techniques in the past, you had to read dozens of books and psychological journals to decode the science behind it. Page 40/51

Or, you had to hire an expensive private tutor who specializes in SuperLearning. That's what I did. And it changed my life. Fortunately, my co-authors (experts and innovators in the fields of superlearning, memory improvement, and speed reading) agreed to help me transform their materials into the first ever digital course. Page 41/51

Over 25,000 satisfied students later, we have transformed our course into a book you can enjoy anywhere. Our teaching methodology relies heavily on at-home exercises. The chapters themselves are only part of what you're buying. You will be practicing various exercises and assignments on a regular basis over the Page 42/51

course a 7 week schedule. In addition to the lectures, there are hours of supplemental video and articles which are considered part of the curriculum. "This vital book contains all the tools needed to learn, memorize, and reproduce anything you want with the joy that ease brings. Don't take another class until you've read Page 43/51

it!" -Dr. Anthony Metivier, Author & Memory Expert If you wish to improve memory and concentration, learn more effectively, read faster, and learn the techniques of memory champions - look no further!
