A combination of African responsiveness to market opportunities and the resource constraints on colonial governments meant that the patterns of economic change in colonial (p. 530) Africa owed much to African initiatives. Even the form of colonization was partly endogenous in these terms: it was the rapid development of African export production in West Africa that decided the internal British ...

Abstract. This book critically reflects upon the current state of the field of modern African history. It focuses on the history of the continent in the nineteenth and twentieth centuries, although also looks back to the era of the Atlantic slave trade. Its aim is to consider the evolution of the field and to set out where, after fifty years of sustained research, it has arrived.

Thinking Globally about African Religion - Oxford Handbooks. The global dimensions of African religion sweep across the plains of the African continent and into the African diaspora. Contemporary "African religion" is itself a product of globalization, for it is less a single tradition than a sociological context in which the elements of a variety of indigenous religious experiences are combined with Islam and Christianity.

The Oxford Handbook of Modern African History was written by 26 of the worlds leading experts on African History. They are all white - from Europe or North America. Not a single African was engaged to contribute to their own history! As such, this is a new version of how westerners with interpretation privilege describe Africans - "the others".
