The Shias of Pakistan are the world's second largest Shia community after that of Iran, but comprise only 10-15 per cent of Pakistan's population. In recent decades Sunni extremists have increasingly targeted them with hate propaganda and terrorism, yet paradoxically Shias have always been fully integrated into all sections of political, professional and social life without suffering any discrimination. In mainstream politics, the Shia- Sunni divide has never been an issue in Pakistan. Shia politicians in Pakistan have usually downplayed their religious beliefs, but there have always been individuals and groups who emphasised their Shia identity, and who zealously campaigned for equal rights for the Shias wherever and whenever they perceived these to be threatened. Shia 'ulama' have been at the forefront of communal activism in Pakistan since 1949, but Shia laymen also participated in such organisations, as they had in pre-partition India. Based mainly on Urdu sources, Rieck's book examines, first, the history of Pakistan's Shias, including their communal organisations, the growth of the Shia 'ulama' class, of religious schools and rivalry between "orthodox" "ulama" and popular preachers; second, the outcome of lobbying of successive Pakistan governments by Shia organisations; and third, the Shia-Sunni conflict, which is increasingly virulent due to the state's failure to combat Sunni extremism.

Based on papers originally presented at a conference in Churchill College, Cambridge, this book discusses the pre-independence history of those areas of the South Asian sub-continent that territorially became the Pakistan of 1947. Titles in the series include "South Africa: A Modern History".

With special reference to Baluchistan, 'Nomadism and Colonialism' documents impressively the lasting effects of dominant external colonial influence on local nomadic societies. In general terms, illustrated by specific examples, the author succeeds in showing the diversity and lasting impact of the externally induced deformation of internal structures and their importance for the development of the present time.

This book is a detailed analysis of the food scarcity and epidemics among the womenfolk and other vulnerable sections of society in colonial Orissa. Its major significance lies in the fact that the food crisis, mass exodus and adverse sex ratio continue to raise questions in the contemporary world. Studies of such experiences help in re-designing strategies to meet the challenges arising from natural disasters, wars, pandemics, besides poverty and uncertain production outcomes. The study of Orissa Famine of 1866 explodes the myth upheld by the colonial administrators that women died at a lower rate than men in famines, because they could easily adapt to food scarcity and were supposedly less prone to infectious diseases. Evidence based on historical, sociological and biological factors showed that increasing male migration, much of it, leading to high mortality, explains the change in sex ratio during the colonial period. This work also shows that many of today's consumption preferences, linguistic usages and cultural habits of people, carry traces of cataclysmic experiences. This book also highlights the fact that most famines are the result of policy failures and, are often rooted in structural inequalities with serious consequences for women, lower castes and the poor alike. Please note: Taylor & Francis does not sell or distribute the Harback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.
