Don't get me wrong, it's great to be a beneficiary of satellite technology. But I can't help but feel a little sad when I look at images showing the hundreds of satellites buzzing around Earth's beautiful blue disc. In some of those images, our planet looks like a Chia Pet, sprouting an ungainly mop of man-made hair. – William Harris. Related ...

Educator Guide: Build a Satellite | NASA/JPL Edu
By remotely sensing from their orbits high above the Earth, satellites provide us much more information than would be possible to obtain solely from the surface. Using satellites, NOAA researchers closely study the ocean. Information gathered by satellites can tell us about ocean bathymetry, sea surface temperature, ocean color, coral reefs, and sea and lake ice.

How are satellites used to observe the ocean?
In the telecommunications satellite industry, the surprise is how many poor nations find a place in their budgets for satellite development. The phenomenon is not just small technology demonstrators.
