efficiency of a single-operator robotic system, the power of long range reflectorless measurements, and the ability to perform as a hybrid positioning solution. All in a compact system that's a third smaller and twice as fast.

GT Series | Topcon Positioning Systems, Inc.

1) Place the plate level parallel to a line running through the centers of two leveling screws, say, A and B. Use these two leveling screws only and place the bubble in the center of the plate level. 2) Rotate the instrument 180° or 200g around the vertical axis and check bubble movement of the plate level.
