The terraced hillsides, rocky capes, and secluded coves of the French Riviera provide some of the world's most spectacular garden settings, and its delightful climate has drawn legendary figures in the arts, literature, and international society since the eighteenth century. In this beautifully designed volume, Louisa Jones turns her gardening and literary talents to the magnificent gardens of the French Riviera, some beloved by visitors for over a century, but most private and hitherto unphotographed. The author's love of plants and gardening really shines through in the text that weaves history, charming anecdotes, and a detailed description of the gardens and plants featured, from the Rothschild villa to the rustic vigor of a well-tended olive grove. Abundantly illustrated with stunning photographs by Vincent Motte, and complete with a list of gardens to visit as well as a buyer's guide to the best nurseries and plant suppliers in the region, Gardens of the French Riviera is a marvelous gift for any garden lover planning to visit the South of France.

Francis I's ties with the Ottoman Empire marked the birth of court-sponsored Orientalism in France. Under Louis XIV, French society was transformed by cross-cultural contacts with the Ottomans, India, Persia, China, Siam and the Americas. The consumption of silk, cotton cloth, spices, coffee, tea, china, gems, flowers and other luxury goods transformed daily life and gave rise to a new discourse about the 'Orient' which in turn shaped ideas about economy and politics, specifically absolutism and the monarchy. An original account of the ancient regime, this book highlights France's use of the exotic and analyzes French discourse about Islam and the 'Orient'.

Why were Chinese and Indian ways of thinking excluded from European philosophy in early modern times? This is a study of what happened to the European understanding of China and India between the late 16th century and the first half of the 18th century. Investigating the description of these two Asian civilizations during a century and a half of histories of philosophy, this book accounts for the change of historiographical paradigms, from Neoplatonic philosophia perennis and Spinozistic atheism to German Eclecticism. Uncovering the reasons for inserting or excluding Chinese and Indian ways of thinking within the field of Philosophy in early modern times, it reveals the origin of the Eurocentric understanding of Philosophy as a Greek-European prerogative. By highlighting how this narrowing and exclusion of non-Western ways of thought was a result of conviction of superiority and religious prejudice, this book provides a new way of thinking about the place of Asian traditions among World philosophies.

Papers from a symposium held at the University of Pennsylvania.

University of Pennsylvania

This volume series presents a collection of critical analyses of the structure, historical development, and composition of the elite strata of late Roman, Byzantine, and early Islamic societies in the eastern Mediterranean basin. Elite culture and elite strata in societies leave an unmistakable record in the literature and in the visual and material culture of the world. The contributors to this series set out to analyze aspects of these phenomena in the late ancient and early medieval eastern Mediterranean world. Culture change, economic foundations, political roles and function, social composition, and background and origins of old and new elites are the focus of the contributions by scholars who deal with the fate of the later Roman elite and its successors. The ways in which elites perceived themselves and how they created, maintained, and enhanced their identity, and the ways in which others both within and outside of their own society and culture saw them are important! themes. The structure of new Byzantine elites and the role of late Roman and Byzantine provincial elite society, the development of new elites in early Islamic society, the role played by pre-state elites and their fluctuating identities in the context of clan and tribal social organizations are all treated.

The contributors of the volume draw on cognitive and social science, suggesting fresh ways of approaching Christian origins and early Judaism. Its multidisciplinary and radically new perspective to its subject matter is highly relevant for all scholars of religion.
